

Test Report for pages <http://testingcup.pl/> oraz <http://blog.testingcup.pl>

Aim: Provide a general quality overview of the web-page and related blog

Test environment desktop: Operating system: Windows 10 Enterprise 64-bit, Google Chrome Version 63.0.3239.132 (Official Build) (64-bit) was used as a main browser.

High Contrast v.0.93 Chrome add-ons for accessibility testing was used.

Additionally were used MS Edge and Firefox in the most recent available version.

Notepad++

Mobile environment: iPhone 5SE, iOS 10.3.3, Chrome for iOS Version 64.0.3282.112

All tests were performed by me, Aleksander Zaleski between Jan 23-24th,2018. Total test time - 5 hrs.

Requirements:

No requirements for <http://testingcup.pl/> were found except of contest conditions, so critical thinking, common sense, and expert's knowledge were applied.

Test Scope:

Tests include functionality testing as well as proof-reading.

Quick accessibility review didn't find any major issues.

Cookies testing didn't reveal any major issues.

Used techniques and tools:

Page was tested using exploratory testing as well as grey-box testing using Developers tools browsers functionality.

MrBuggy 4 was used for localization of dead links

Depending on the judging criteria those bugs may or may not be counted to the final result.

Testing scope:

The following pages were tested on desktop and mobile environments:

- Main pages related to Testing Cup 2018 available from the top menu;
- Top menu of <http://blog.testingcup.pl> ;
- Articles from <http://blog.testingcup.pl> that has info about current and previous editions of Testing Cup.

Additionally as suggested by MrBuggy4 instruction we applied export of test report to XML,CSV, and PDF and included some of the valid data in the current report

Statistics:

Typos found: >20

Broken links found: >30

Mr.Buggy report suggests that 99,39% of pages in the testingcup.pl return correct (e.g. 200) HTTP code.

Defects 26-31 were found with support from Mr.Buggy

Outside of testing scope:

According to the rules of the contest "Participant Zone", Newsletter functions and cfp.testingcup.pl were excluded from testing scope

No security and site and server performance tests were conducted.

Usability testing was omitted according to the suggestion from MrBuggy4 instruction. Several usability suggestions are added to the test report.

Overall summary:

Web-page <http://testingcup.pl/> has a considerably high quality. Fixing of several minor defects and typos should improve the overall quality.

Blog entries have some dead links that need to be fixed or removed.

Areas outside the current testing scope might have defects as well, so we recommend addressing their quality as well.

Additional testing might require up-to 10 man-days.

Improvements:

1. Page with 2015 edition

whilst pages for 2016 and 2014 editions lack this images

<http://blog.testingcup.pl/prezentacje-2016/#>

2. "Become a partner" page could be updated as currently it is empty

1. Goto the <http://blog.testingcup.pl/tag/partner/page/2/#> and scroll to the bottom of the page

2. Find ZOSTAŃ PARTNEREM... and click READ MORE button

<http://blog.testingcup.pl/zostan-partnerem/>

3. Unify style and data organization of lists of participants

Editions of 2016 and 2015 have list of participants shown differently.

For 2016 edition there are two separate pages for team and individuals.

For 2015 edition there is

one page with teams and individuals. List of participants has a different graphical style in comparison with list from 2016. It might be a good idea to unify graphical style (background, font etc)

4. Improvement: Add tag "testingcup-2018" to blog

5. List of winners (team/individual) could be included in 2016-2014 editions information
